Signalling control was originally exercised via a

decentralised network of control points that were known by a variety of names including signal box ... Sat, 08 Dec 2018 11:56:00 GMT Signalling control - Wikipedia - Control theory in control systems engineering is a subfield of mathematics that deals with the control of continuously operating dynamical systems in engineered processes and machines. The objective is to develop a control model for controlling such systems using a control action in an optimum manner without delay or overshoot and ensuring control stability.
